

Medicaid Adult Dental Coverage Checker

A tutorial

June 2025

Overview of Tools

Rubric for Assessing Extensiveness of State Medicaid Adult Dental Benefits (Rubric)

A [survey tool](#) that defines an extensive Medicaid adult dental benefit and assesses the extensiveness of existing coverage within each state.

Medicaid Adult Dental Coverage Checker (Coverage Checker)

An interactive tool that displays state-by-state results of the Rubric.

The results represent a snapshot in time and are reflective of coverage offered by each state.

The [Coverage Checker](#) displays information from 2020, 2022, 2023, and 2024 Rubric.

The Rubric

What it is:

- A survey to be completed by state Medicaid dental directors and/or staff.

What it does:

- Defines an extensive Medicaid adult dental benefit.
- Assesses the extensiveness of existing coverage within each state's Medicaid program.

Definition of an Extensive Medicaid Adult Dental Benefit

An extensive dental benefit is one that provides coverage for a range of dental procedures considered adequate for the prevention of disease and promotion of oral health; the restoration of oral structures to health and function; and the treatment of emergency/urgent conditions for the largest group of Categorically Needy Medicaid adult beneficiaries ages 21-64 covered by a state's Medicaid program.

To meet this definition, states must:

- cover specific procedures and services, including allowed frequency, in eight specific service categories; and
- have an annual benefit maximum greater than or equal to \$1,000.

Service Categories:

Annual benefit maximum
Diagnostic services
Preventive services
Restorative services
Endodontic services
Periodontal services
Prosthodontic services
Extraction services

The Medicaid Adult Dental Coverage Checker

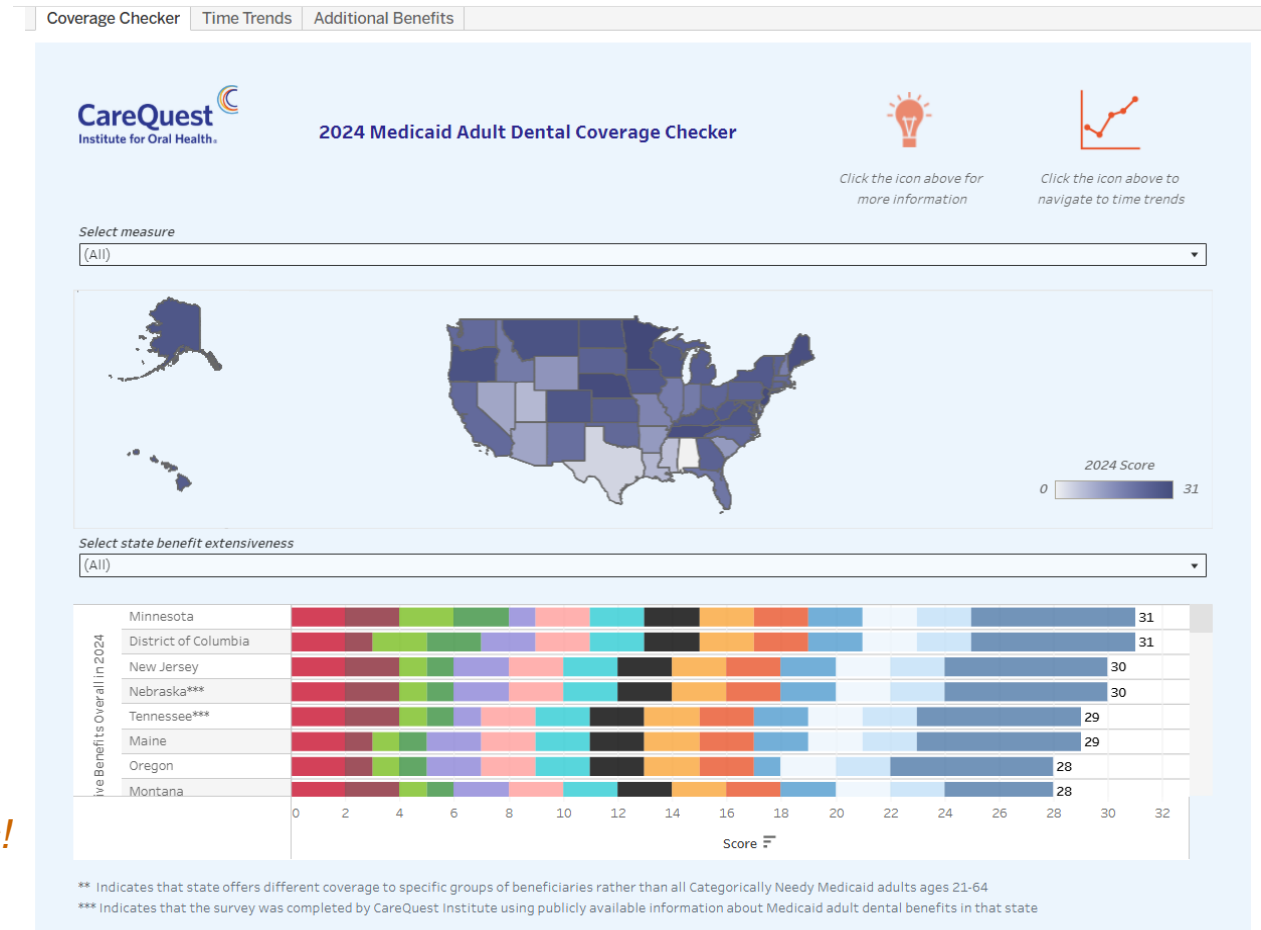

What it is:

An interactive tool that displays state-by-state results of the Rubric.

The results represent a snapshot in time and are reflective of coverage offered by each state at the time of completion.

The results display benefits on a continuum from no benefits to extensive.

*Visit the [2024 Medicaid Adult Dental Coverage Checker](#)
Be sure to explore the entire page for even more resources!*

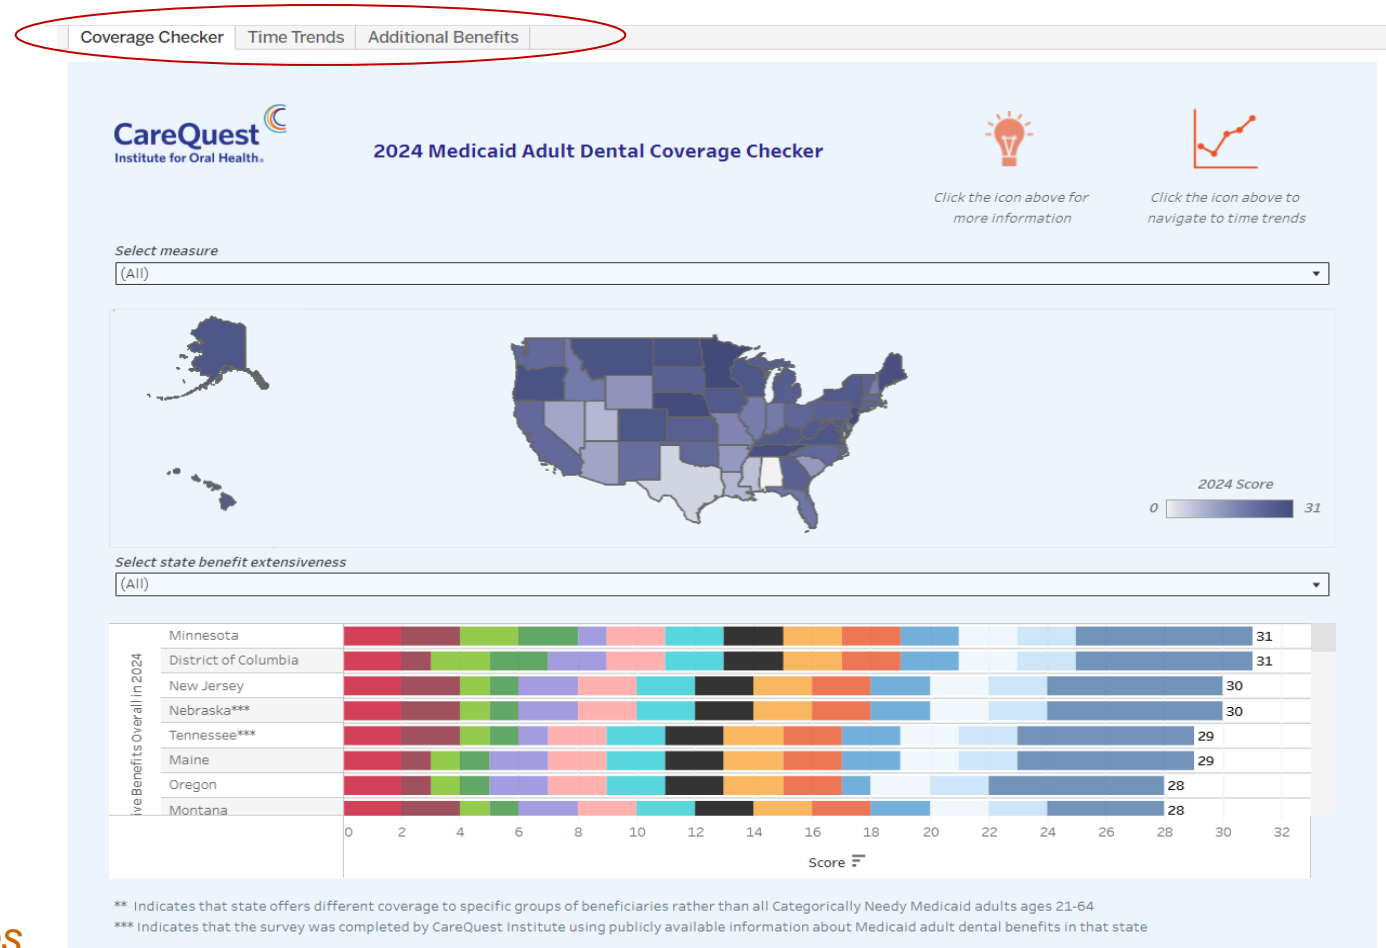

The Medicaid Adult Dental Coverage Checker

The Coverage Checker contains three main sections:

- Map with responses by survey question/measure and benefits continuum with points received by survey question/measure by state
- Time trends (2020, 2022, 2023, 2024)
- Additional 2024 Benefit/Program Information

Each section can be accessed by the tabs located at the top of the page

The Medicaid Adult Dental Coverage Checker is an interactive tool that displays self-reported results from state Medicaid dental programs in a survey conducted in the spring of 2025. The data represent a snapshot in time and are reflective of the benefit package in place as of December 31, 2024.

The survey assesses coverage of specific procedures and services, including allowed frequency, in eight service categories (annual benefit maximum, diagnostic, preventive, restorative, endodontic, periodontal, prosthetic, and extraction services).

The service categories included in the survey encompass a range of oral health procedures that are critical to maintaining lifelong oral health in adults. However, users should not interpret coverage of these procedures as coverage of all procedures within a CDT service category.

Extensive Medicaid adult dental benefit defined:

An extensive dental benefit is one that provides coverage for a range of dental procedures considered adequate for the prevention of disease and promotion of oral health, the restoration of oral structure to health and function, and the treatment of emergency/urgent conditions for the largest group of Categorically Needy Medicaid adult beneficiaries, aged 21-64.

To meet the definition of an extensive Medicaid adult dental benefit, a state must:

1) Receive a total of 19 points or greater;
2) Not receive a "0" in any of the eight service categories; and
3) Have no annual benefit maximum or have an annual benefit greater or equal to \$1,000.

** Indicates that state offers different coverage to specific groups of beneficiaries rather than all Categorically Needy Medicaid adults ages 21-64

*** Indicates that the survey was completed by CareQuest Institute using publicly available information about Medicaid adult dental benefits in that state

Hover over the Lightbulb icon and the following informational 'Tool Tip' will pop up.

Click on the Lightbulb icon and the 2024 Rubric survey and user guide will open.

Click on the Time Trends icon and you will be taken to a new screen with data from 2020, 2022, 2023 and 2024.

Indicates that state offers different coverage to specific groups of beneficiaries rather than all Categorically Needy Medicaid adults ages 21-64.

Indicates that survey was completed by CareQuest Institute using publicly available information.

Section One:

Map with responses by
survey question/measure

- This is the initial screen you will see when you visit the Coverage Checker.
- Use the drop-down menu on the top right side of the screen to click on a specific survey question/measure.
- The map and the continuum below will change to reflect that specific question/measure.

Please note: A state's Medicaid adult dental benefits program is considered 'Extensive' if it receives a total of 19 points or greater, does not receive a '0' in any question/measure, and receives a '4' or '6' in Question 1 (Annual Benefit Max).

Select measure

Annual Benefit Max 1

** Indicates that state offers different coverage to specific groups of beneficiaries rather than all Categorically Needy Medicaid adults ages 21-64

*** Indicates that the survey was completed by CareQuest Institute using publicly available information about Medicaid adult dental benefits in that state

Section One:

Map with responses by
measure/survey question (*cont'd*)

- Use the drop-down menu on the top right side of the screen to click on a specific survey question/measure. Then hover over a state to view survey responses to that question/measure.
- The map will change to reflect the specific question/measure selected.

This is an example of Alaska's response to the Annual Benefit Maximum question/measure.

When you hover over Alaska, you will see the survey responses to this question/measure for 2020, 2022, 2023, and 2024.

The continuum below will change so that you can see each state's response to the Annual Benefit Maximum question/measure in 2024.
