

State-Based Strategies for Dental Data Exchange and Care Coordination

Oral Health Information Technology Virtual Convening

November 29, 2021

Housekeeping

- We will keep all lines muted to avoid background noise.
- We will send a copy of the slides and a link to the recording via email after the live program.
- We'll also make the slides and recording available on carequest.org.

To receive CE Credits:

- Look for the evaluation form, which we'll send via email.
- Complete the **evaluation** by **December 7**
- You'll receive a certificate soon after via email.

We appreciate your feedback to help us improve future programs!

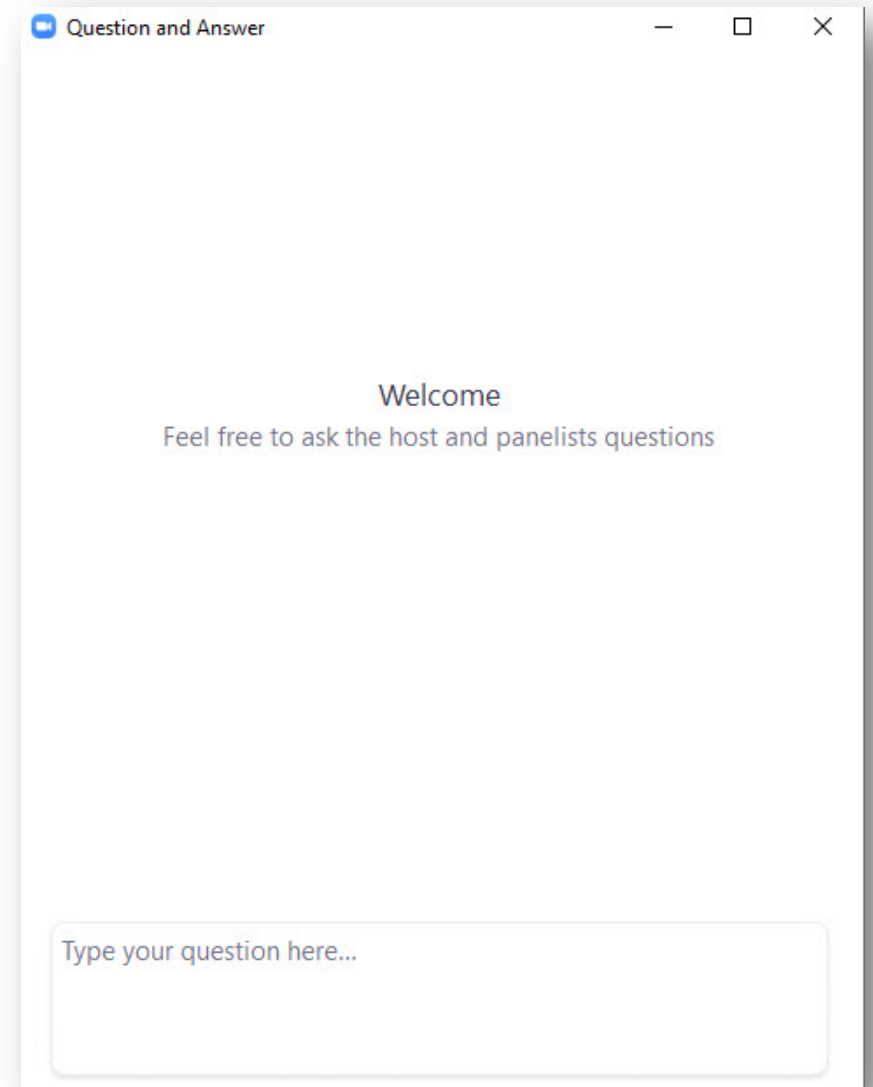

The CareQuest Institute for Oral Health is an ADA CER-P Recognized Provider. This presentation has been planned and implemented in accordance with the standards of the ADA CER-P.

*Full disclosures available upon request

Question & Answer Logistics

- Feel free to enter your questions into the **Question & Answer box** throughout the presentations.
- We will turn to your questions and comments toward the end of the hour.

Learning Objectives

At the end of this virtual convening, you'll be able to:

- Summarize the value of integrating oral health into health information exchanges.
- Identify opportunities to engage in state-based oral health information exchange.
- Describe the current challenges and opportunities for oral health information exchange.

Our Strategy

Vision

A future where every person can reach their full potential through optimal health

Mission

To improve the oral health of all

Purpose

To catalyze the future of health through oral health

participants and data sources

More than 1,600 organizations across 4,200 locations are connected!

9 million patients are able to receive better care

26-county service area

440,000 unique patients accessed per month

3.4 million clinical summary documents received each month

More than 600 organizations providing data

Whole Person Care

The Driver for Oral Health Data Exchange in Colorado

Dr. Katya Mauritson, Colorado Dental Director

Evon Holladay, MBA, Consumer Advocate

Oral Health Impact

Treating Gum Disease Means Lower Annual Medical Costs

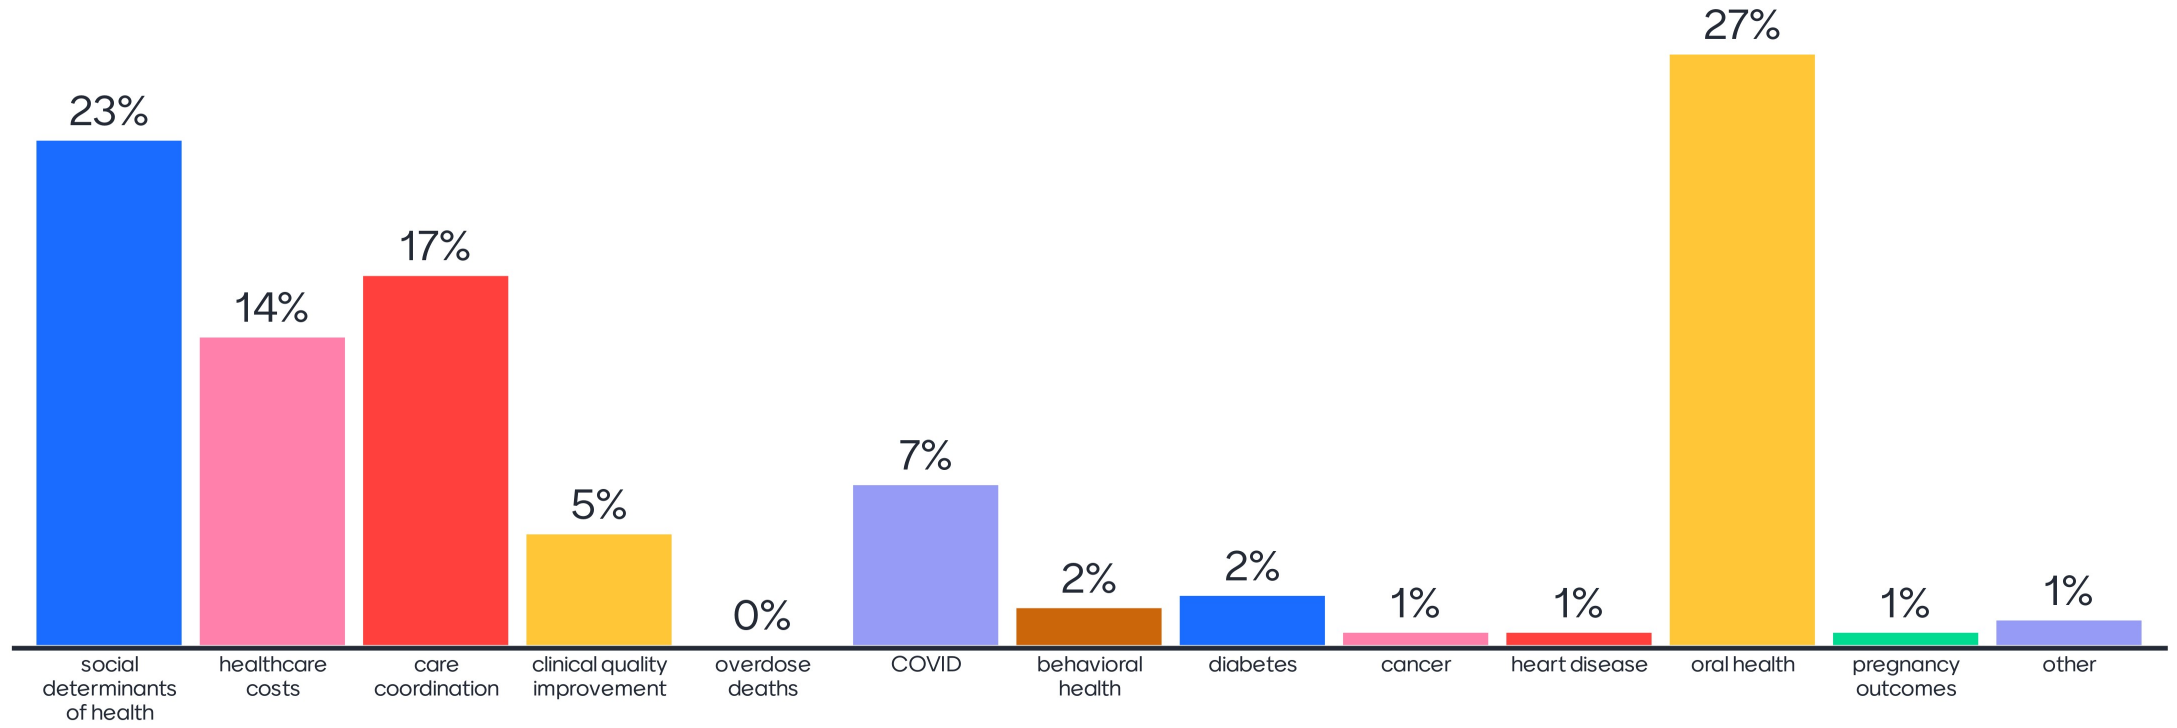

Significant annual cost savings are possible when individuals with certain chronic diseases (diabetes, cerebral vascular disease, or coronary heart disease), or who were pregnant, received dental treatment for their gum disease, after accounting for the effect of diabetes.

Treating Gum Disease Reduces Hospital Admissions

Significant decreases in annual hospitalizations are possible when individuals with certain chronic diseases received dental treatment for their gum disease, after accounting for the effect of diabetes.

Of the following, what are the top three (3) topics that impact your work the most?

***Association between dental care
and reduced hazard of emergency
department utilization in
individuals with diabetes***
White Paper, 2020

coaccess.com

800-511-5010

customer.service@coaccess.com

11100 East Bethany Drive
Aurora, CO 80014

Executive Summary of Findings

- Literature suggests that periodontal care may reduce diabetes-related complications, and poor periodontal disease control may exacerbate diabetes symptoms and increase the risk of diabetes-related complications.
- All measured forms of dental care were associated with reduced emergency department (ED) visits for uncontrolled diabetes after accounting for numerous other claims-based indicators of diabetes management and comorbidities (e.g., chronic obstructive pulmonary disease, congestive heart failure, hypertension, etc.).
- In those members with two or more diagnostic dental visits, the hazard of an ED visit is reduced nearly 60% ($p < 0.0001$). Additionally, there may be a potential dosage effect where individuals with two or more periodontal treatments had a 59% ($p = 0.004$) reduced hazard, where individuals with one periodontal treatment (after adjustment) did not have a reduced hazard over those who had no dental claims.

Effectiveness on Early Childhood Caries of an Oral Health Promotion Program for Medical Providers

American Journal of Public Health, 2017

Objectives. To assess an oral health promotion (OHP) intervention for medical providers' impact on early childhood caries (ECC).

Conclusions. An OHP intervention targeting medical providers reduced ECC when children received 4 or more FVAs at a medical visit by age 3 years.

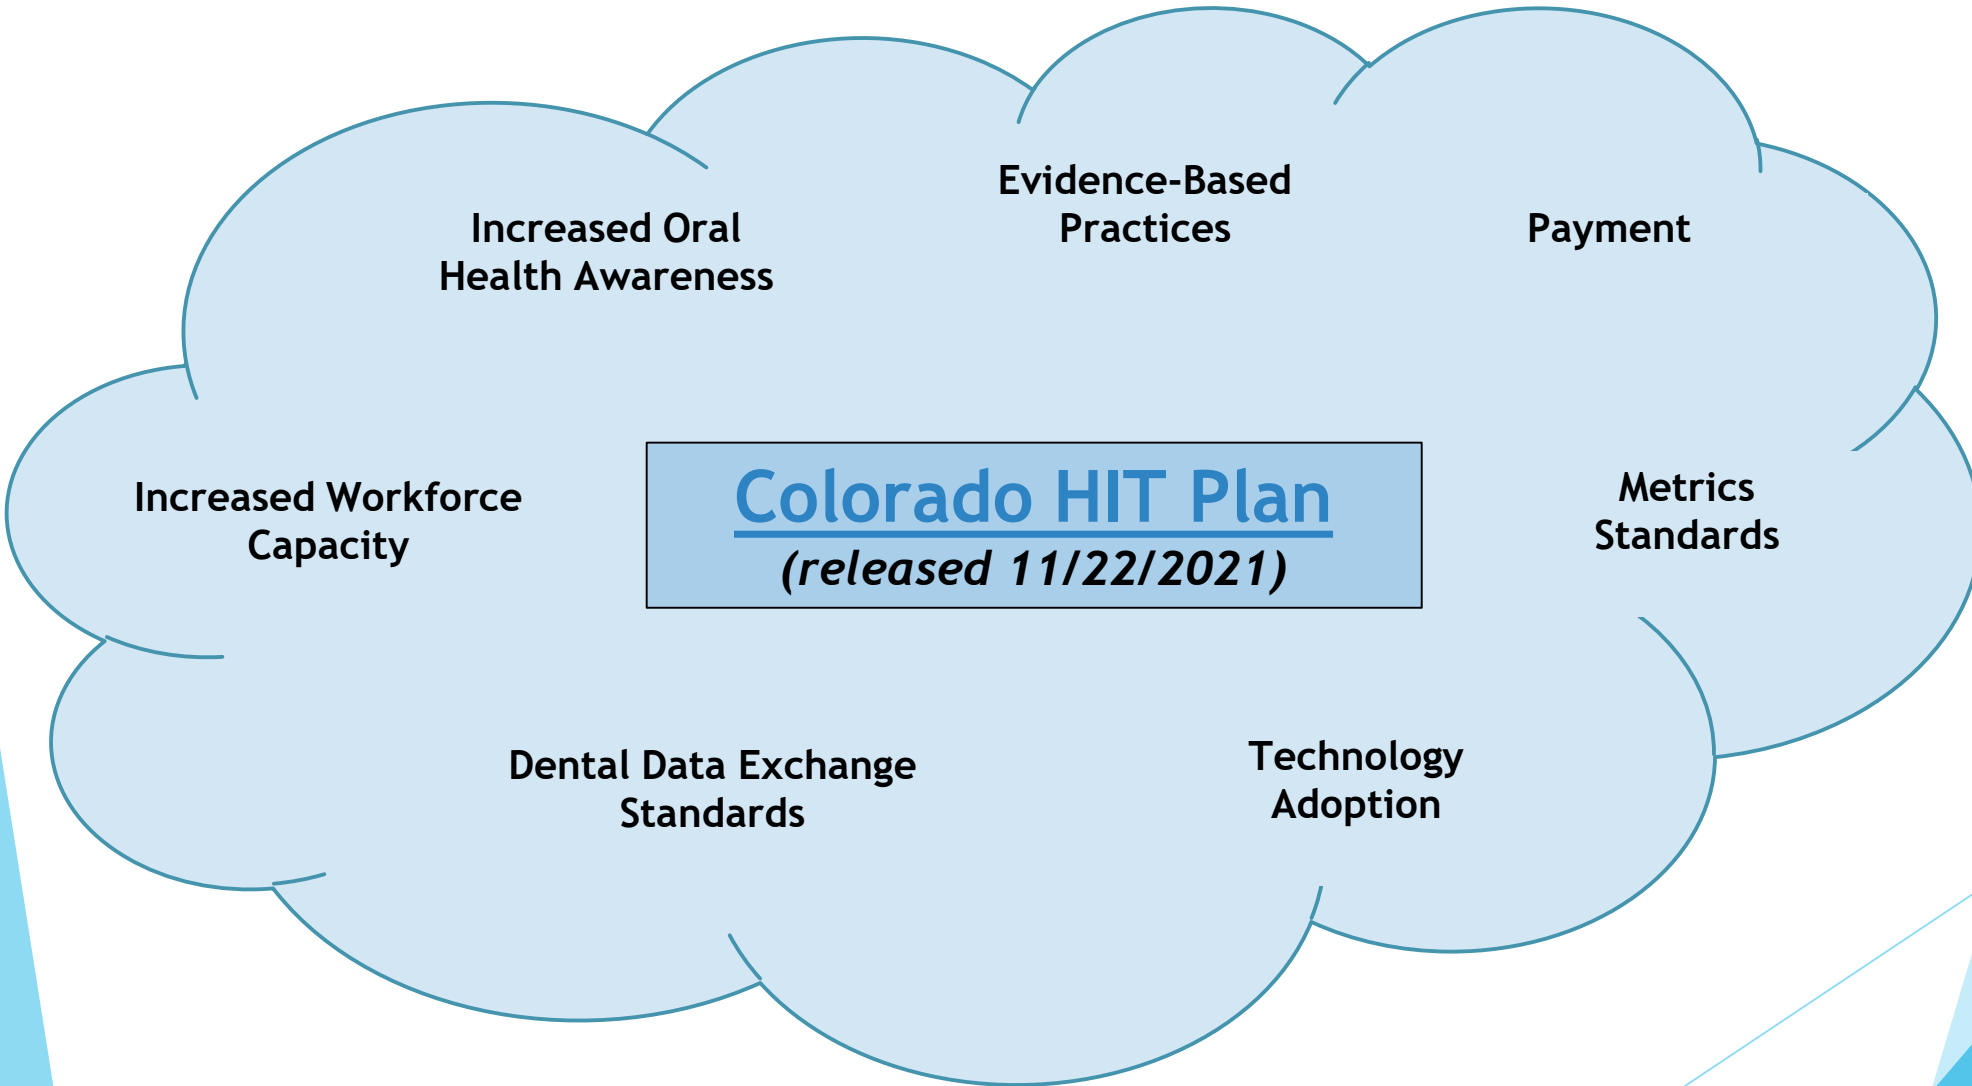

Four by Three

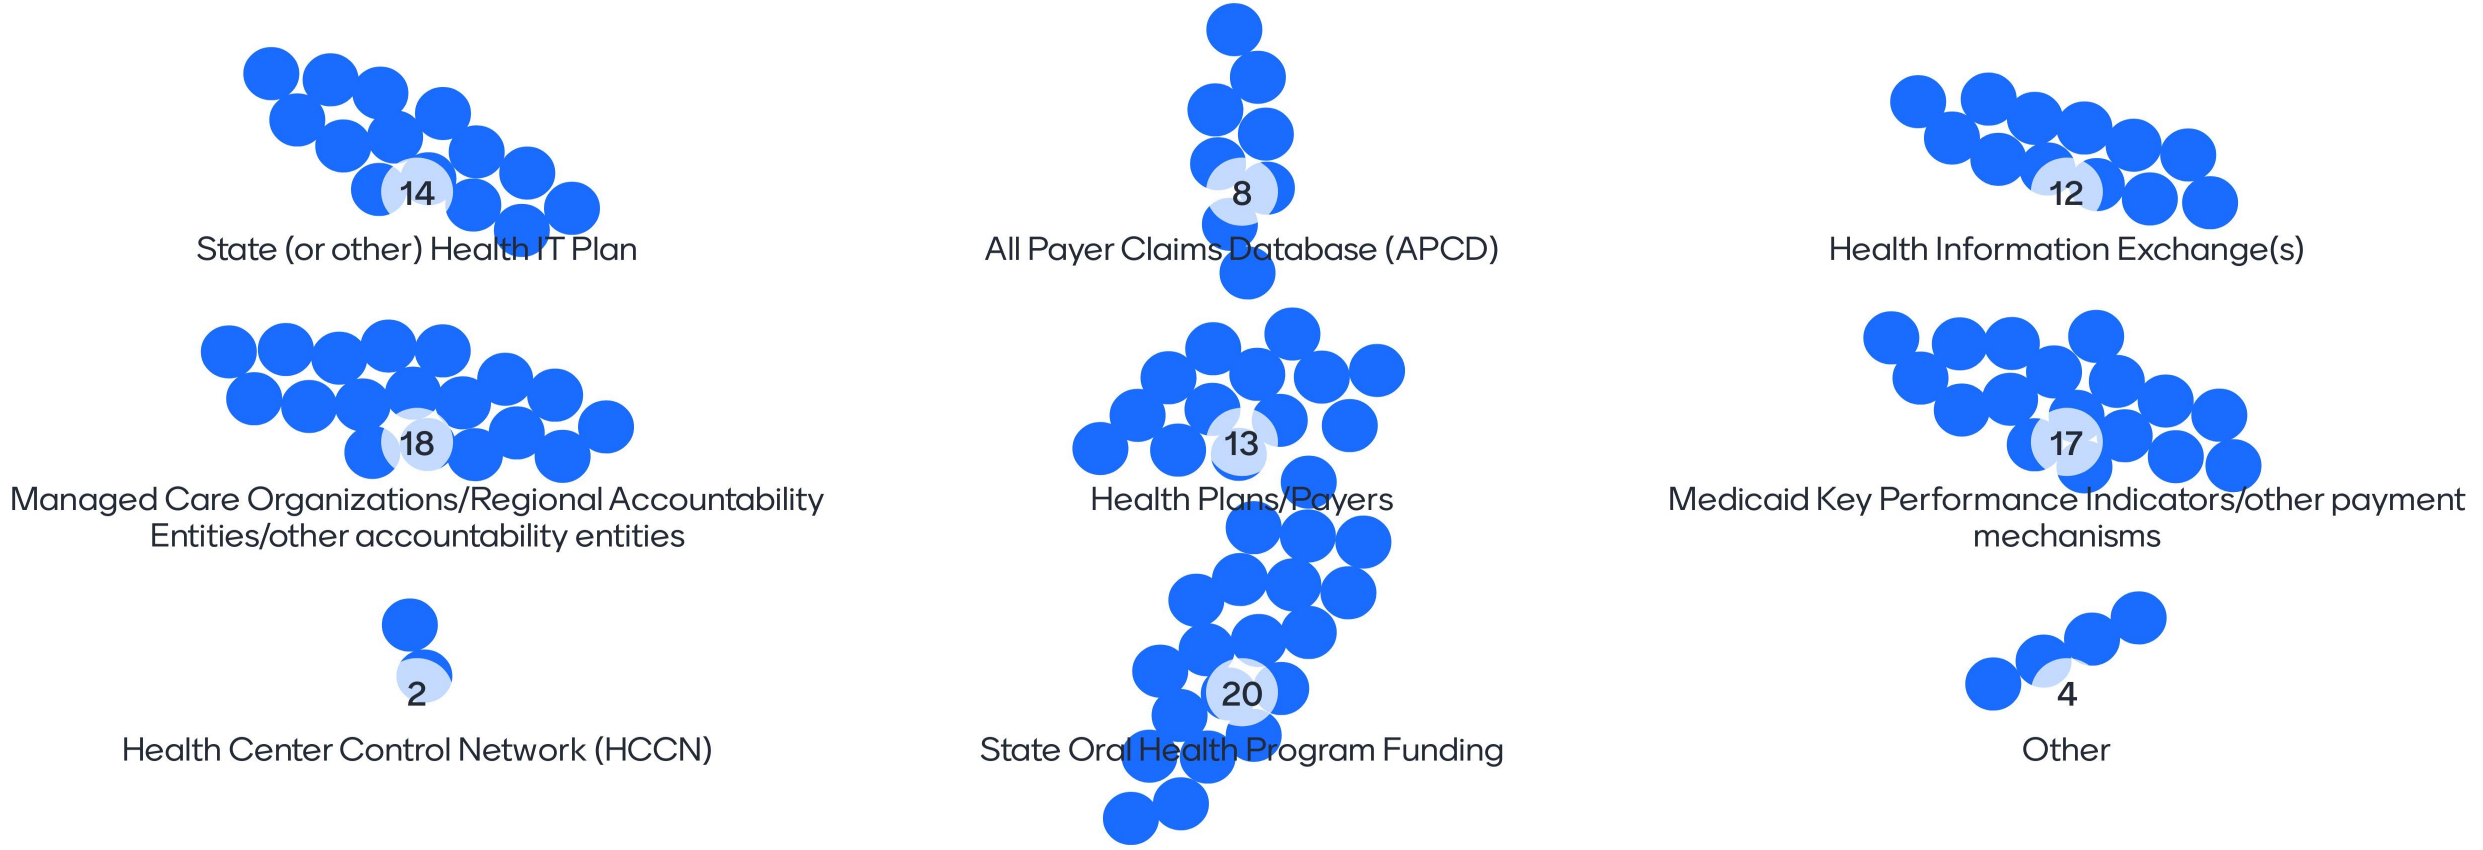

4 FLUORIDE VARNISHES BY AGE 3 REDUCES CAVITIES

Colorado's "perfect storm"

What state assets or partners do you have in place that you can use as a catalyst for oral health HIT integration?

- ▶ Use cases
- ▶ State HIT plan
- ▶ State Oral Health Plan
- ▶ Funding
- ▶ National EDR FIHR

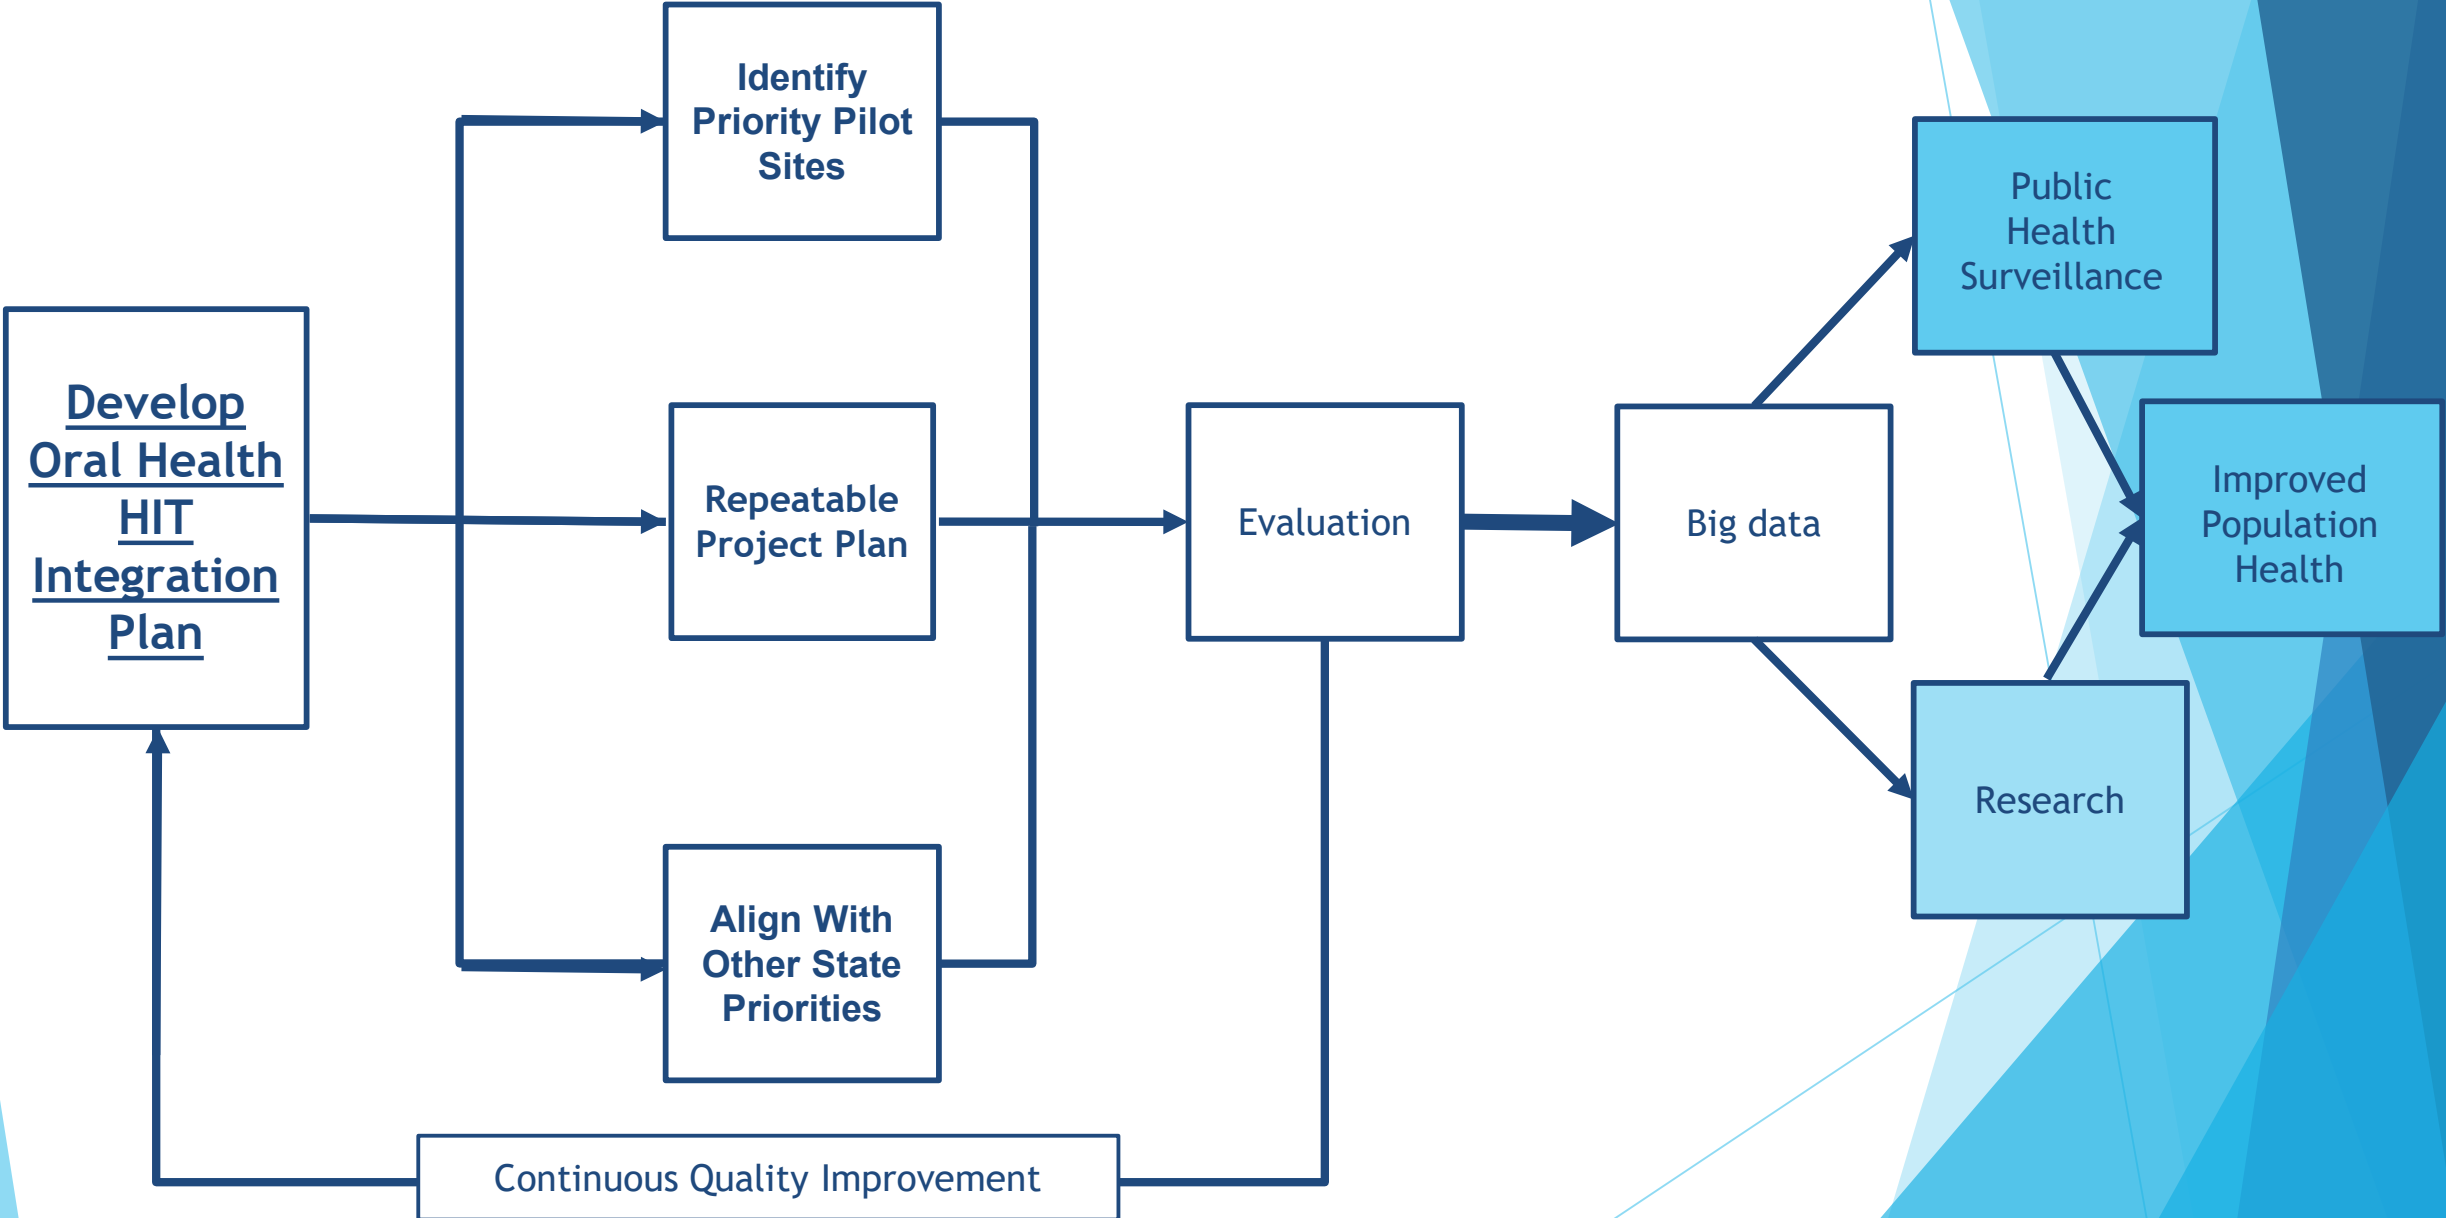

Opportunities

- ▶ COVID impact
- ▶ Reimbursement
- ▶ Telehealth
- ▶ Social HIE
- ▶ Workforce development
- ▶ Backbone organization

A scenic landscape featuring a winding asphalt road in the foreground, flanked by green grass and shrubs. The middle ground is filled with trees in various stages of autumn, showing shades of yellow, orange, and green. In the background, a range of rugged mountains is partially covered in snow, set against a clear, bright blue sky. A semi-transparent white banner with a blue border is overlaid on the left side of the image, containing the text "Which Path To Take".

To Take**

Next Steps

Thank you!

HIE & Dental HIE in Oregon: Realities, Solutions, and Strategies

Manu Chaudhry, MS, DDS

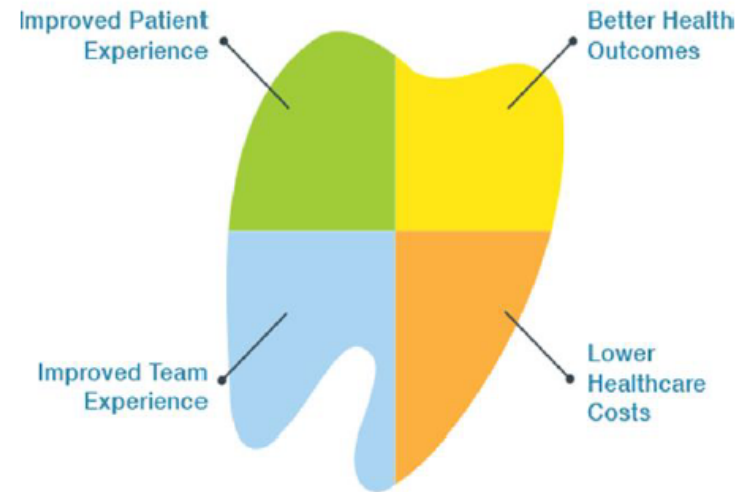

ChaudhryM@interdent.com

President, Capitol Dental Care

- Oregon Health System
- History of HIE & Dental HIE
- 2021-2024 State HIT Roadmap
 - Integrating Dental
- Thoughts & Ideas
 - “The level of the solution is never at the level of the problem”

paraphrased from Albert Einstein

Oregon Health System & Dental

- 2015-19 Coordinated Care Organizations (CCO 1.0)

- Vision: integrate care across physical, behavioral, and dental organizations and all providers for Oregon Health Plan (OHP) Medicaid beneficiaries
 - Quality incentive measures (QIMs) and other metrics
- Plans are capitated and risk-bearing
- Dental Care Organizations (DCOs) contract with CCOs to provide dental network and achieve QIMs and other metrics

- 2020-24 CCO 2.0

- Expansion: Health Equity Plan, RHIP, **HIT Roadmap**, health-related services (HRS) to employ non-medical services to address members' health-related social factors and inequities that contribute to poor health (SDOH)

- 2025-20 CCO 3.0 (under review)

- Vision: advance health equity, value-based global payments

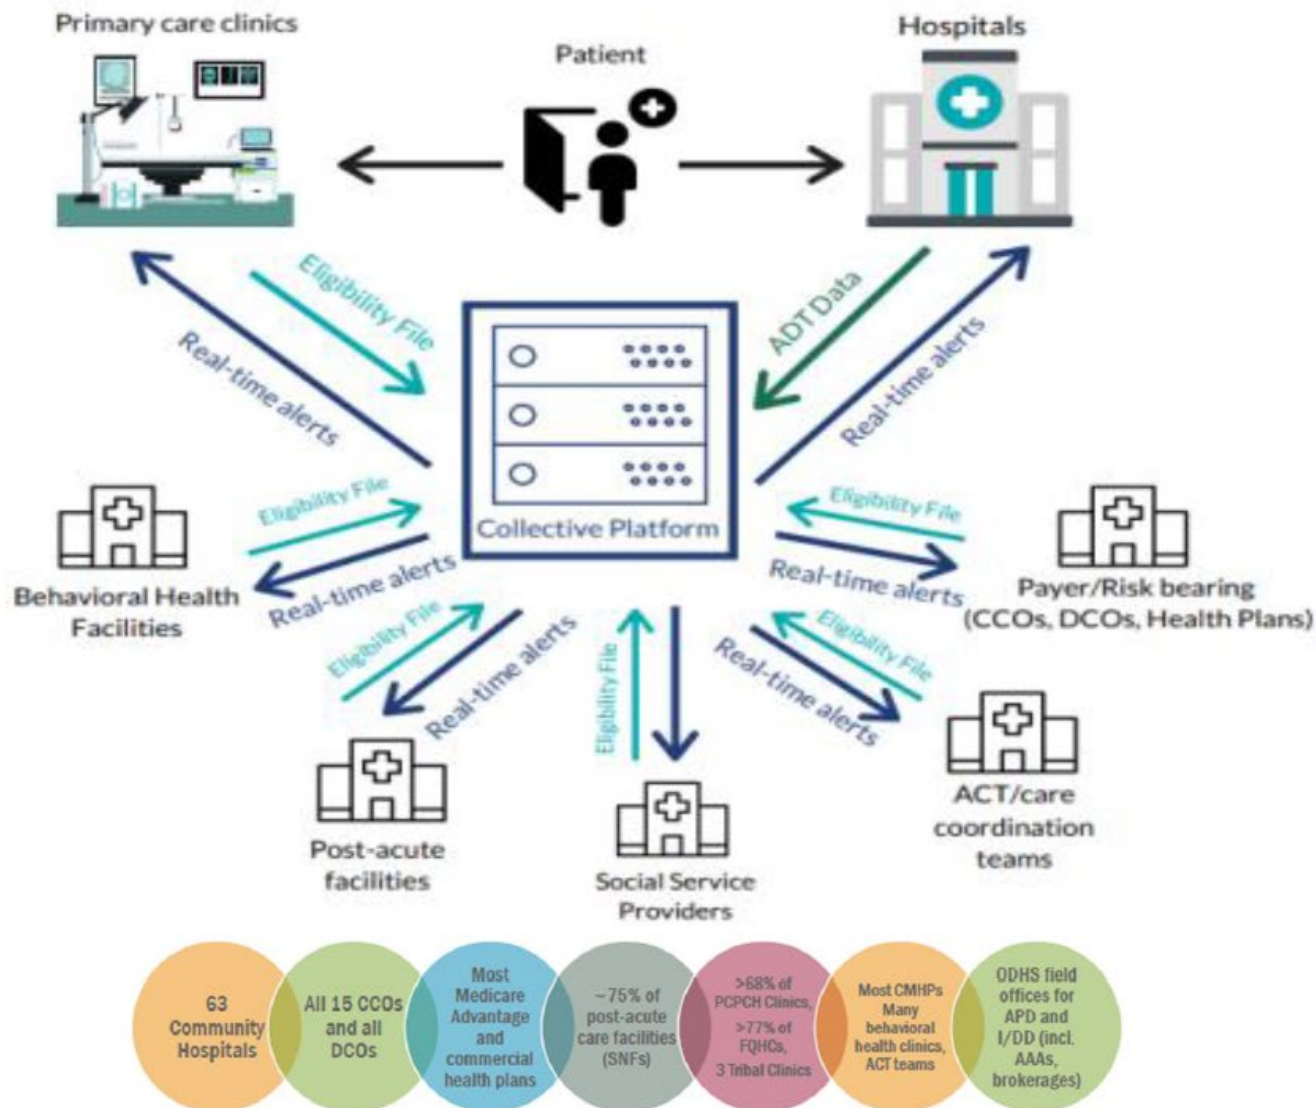

History of HIE in Oregon

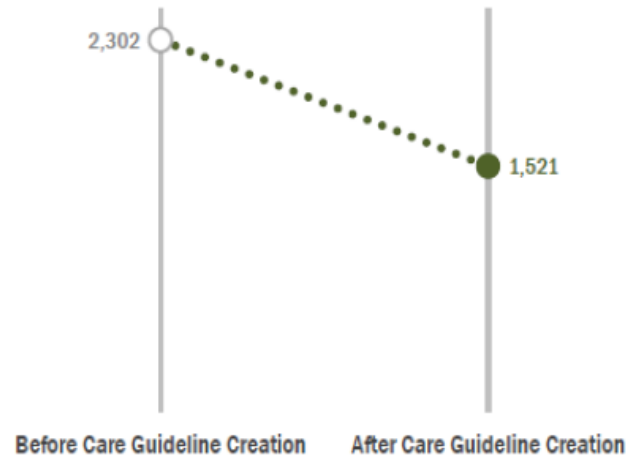

- 2009 Health IT for Economic and Clinical Health (HITECH) part of American Recovery and Reinvestment Act (ARRA)
 - Open market
 - Creation of Health IT Oversight Council (HITOC)
- 2013-16 HITOC Strategic plan
 - Emergency Department Information Exchange (EDIE)
 - Provider Directory
 - Electronic Clinical Quality Measures Repository (eCQMR)
 - Meaningful Use
- 2016/17 HIT Commons formation
 - Leadership for HIT programs
- 2017-2021 HITOC Strategic plan
 - HIE promotion/implementation & CIE

EDIE (Collective Platform, Premanage)

EDIE, Dental-EDIE, & PDMP

There has been a 34% reduction in ED use with high utilizers (5+ visits per year)

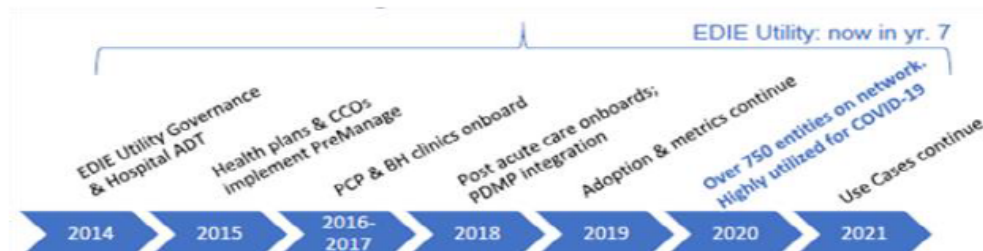

Remember Deamonte Driver...

151 children < age 12 of **2868**

Medicaid members referred through EDIE with Dental issue since **March 2020** and connected all with a dentist*

*Capitol Dental Care, internal data, as of 11/26/21

Prescription drug monitoring program (PDMP):
Check for medication history last 3 years across states

HITOC 2017 Strategic Plan

- 2017 Approaches to Achieve Statewide HIE
 - Supporting and connecting **robust network of HIEs**
 - Providing **baseline services** to those facing barriers
 - Offering statewide **enabling infrastructure** to leverage existing investments and opportunities
 - Providing access to **high-value data** sources
 - Coordinating stakeholders to establish a **shared governance** model
- HIE Onboarding program
 - **February 2016:** Funding approved under the HITECH for HIE onboarding of certain Medicaid providers
 - **2016 – 2018:** Oregon HIE Onboarding Program development
 - Stakeholder input & study of other states administering similar programs
 - Request and approval of funding (90% CMS match, 10% state match)
 - **January 2019:** Oregon launched HIE Onboarding Program

- HIE Onboarding program concluded 9/30/21
- Over \$2.4 million was spent to onboard 72 unique entities to the HIE platform
 - 7 major trading partners
 - 4 hospitals
 - 1 diagnostic laboratory system
 - 2 multispecialty groups
 - 49 critical physical health organizations
 - 2 tribal clinics
 - 1 correctional organization
 - 12 behavioral health organizations
 - **4 dental offices**

2021-24 State HIT Roadmap & Ideas

- Integrated HIT partnership
 - Collaborate with CCOs and HIE vendors to examine existing dental HIE
- Support for Electronic Health Record (EHR) adoption for physical, behavioral, and oral health providers
 - Identify information useful for Dental HIE
 - Explore strategies to expand and connect to other HIEs and platforms
 - Ability for Dental EHRs to hold and display data
 - HIE methods supported by vendor systems
- Support for Health Information Exchange (HIE) for Care Coordination
 - Evaluate efficacy of the dental request referral process by cross-walking claims data with those members who had a request through the portal to follow up with members and analyze “connection” success rates
 - Develop one-way electronic referrals from DCOs to other portals to improve care coordination
- Support for Health Information Exchange (HIE) Hospital Event Notifications for physical, behavioral, and oral health providers, and CCO use of Hospital Event Notifications
 - Promote further use of EDIE
 - Analyze “connection” success rate
- Health IT for Value-Based Payment (VBP) and Population Health Management
 - HIT Tools and Workforce
 - HIT to administer VBP Arrangements & Support for providers with VBP

Thoughts & Ideas

- Policy alignment across all organizations/stakeholders with long-term commitment
- Technology – EHR and other vendor commitment for true interoperability for all
- Shift private practice dental providers to submit diagnostic (ICD-10) codes with procedure codes
- Incentivize private practice dental providers to integrate Social Determinants of Health with diagnostic codes and recommended procedures
- Technology – commitment for same hardware and software
 - Health record lives with patient
 - CCOs, DCOs, BHOs all have access to record through scanned QR code which patient uses to provide consent
 - Centralized portal for all information
- Shared resources and start with CCOs/DCOs (not providers)
 - After building this system of care, then roll-out to providers
- Additional items to improve care delivery:
 - Avoid duplication of effort
 - Report data that is useful so that searching through data to find information is not necessary
 - Encourage gathering data using the most convenient method (reduce number of clicks)
 - Quadruple aim: address gaps in care and improve utilization

Thoughts & Ideas

- Board member, Health IT Oversight Council (HITOC)
 - Generating strategic plan with integrated dental
 - Volunteered for workgroup with Community Information Exchange
- Board member, Central Oregon Health Information Exchange (COHIE)
- HIT Commons
 - Provides oversight of Collective Medical (EDIE) and PDMP integration and other HIT programs
 - Dedicated dental voice on HIT Commons governance
- Capitol Dental
 - Vision: Healthier Oregonians
 - Actively seeking pilots to innovate electronic workflows and improve systems of care
 - Bi- or tri-directional communication by allowing any kind of provider to request services and care coordination from any other health discipline.
 - Integrate closed-loop electronic referrals and/or preauthorizations within their providers' EDR workflows
 - Explore expansion of EDIE for high risk oral health conditions and/or members
 - Explore expansion of EDIE with dental offices as primary intake site
 - Engage with private practice dental providers for solutions
 - Engage with Dental EHR vendors
 - High-value use case: HbA1c/Diabetes

Thank you!
