

COMMUNITY ORAL HEALTH TRANSFORMATION INITIATIVE (CORHT)

CORHT Kickoff Call

December 9, 2020

DentaQuest[®]
Partnership
for Oral Health Advancement

Kickoff Agenda

- 01 Background & Introductions
- 02 Overview: COrHT Initiative
- 03 Questions?
- 04 Next Steps

Session Participation and Zoom Features

CHAT

Let's try it now!
Introduce yourself by chatting to
'Everyone' with your name, title, city/state,
and organization.

Mute

Please chat in questions & comments
throughout the call

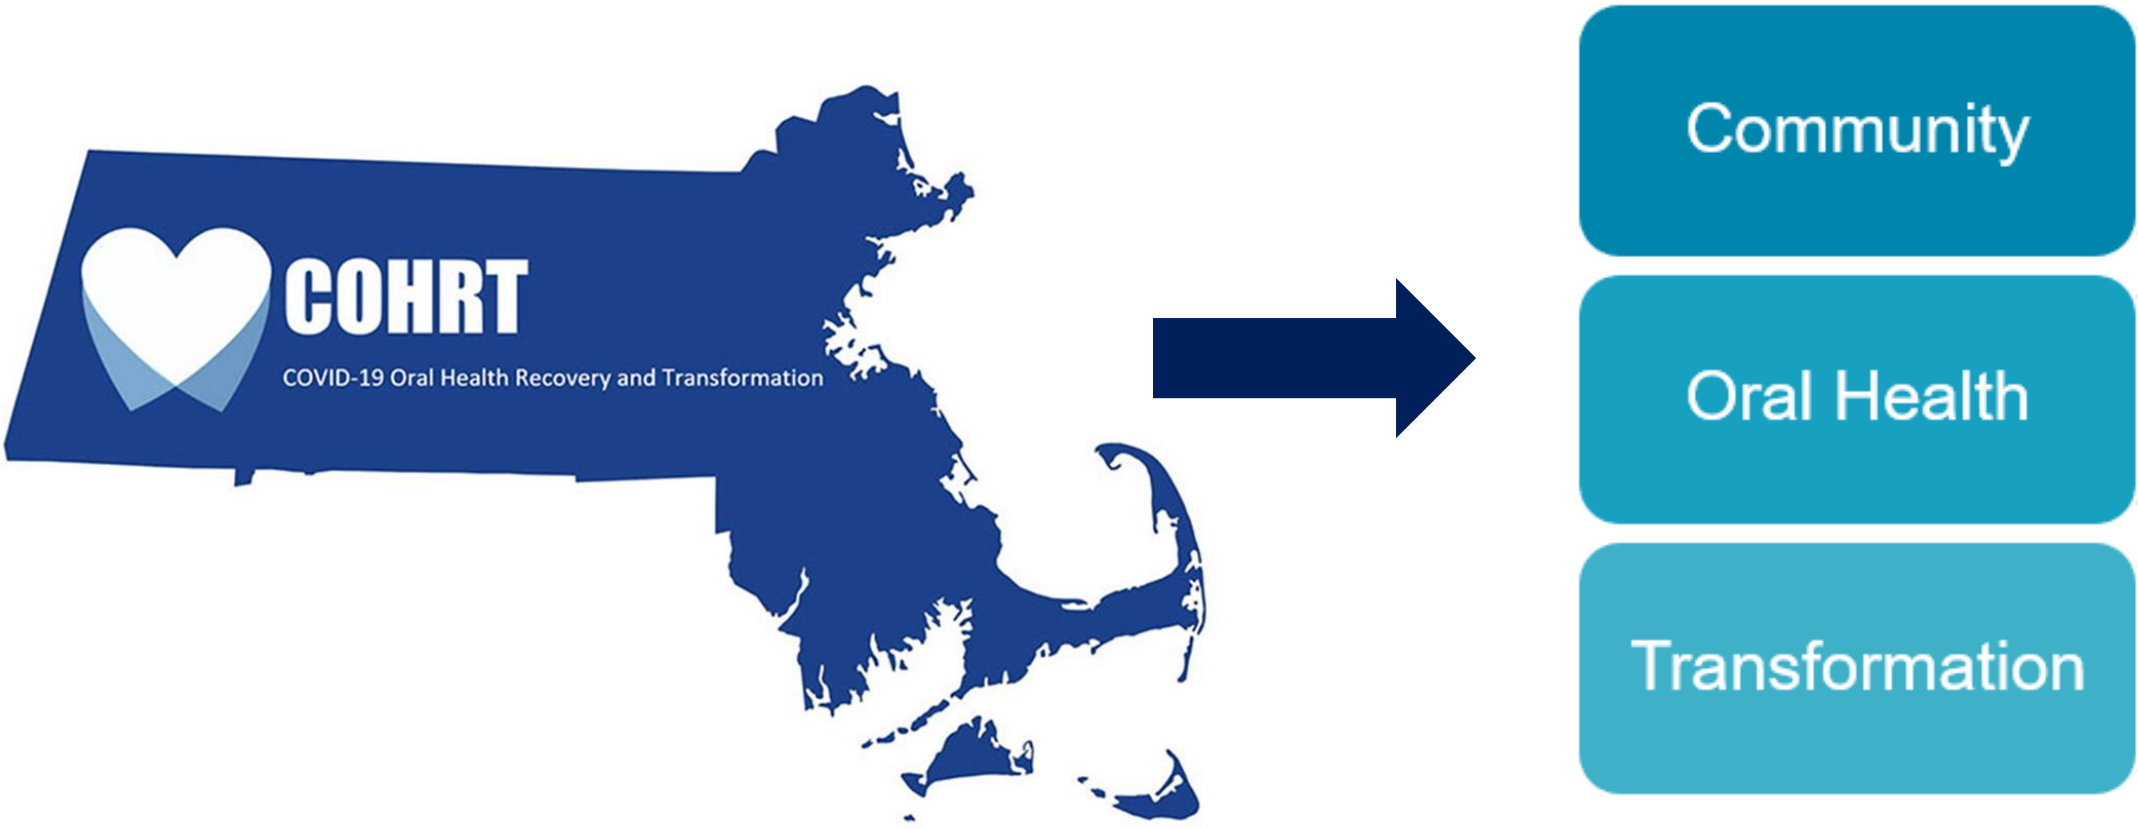

Welcome, Health Center Teams!

BACKGROUND & INTRODUCTIONS

How Did We Get Here: From COHRT to COrHT

Community Oral Health Transformation (COrHT) Initiative

DentaQuest Partnership Project Team

Christine Kenney
Quality Improvement
Specialist

Mary Bayham
Practice Improvement
Trainer

Caroline McLeod
Value-Based Solutions
Manager

Annaliese Cothron
Consultant,
DentaQuest
Partnership

Abby Kelly
Biostatistician

Danielle Apostolon
Value-Based Care
Trainer

Kelli Ohrenberger
Director,
Interprofessional Care

Rebekah Mathews
Director, Value-Based
Care

PCA Involvement

Da-Nell Pedersen
Director, Clinical Programs
Arizona Alliance for Community Health Centers

Susan Lawson
Director of Oral Health Services
Ohio Association of Community Health Centers

Dr. Vinod Miriyala, DDS
Pediatric Dentist
Oral Health Consultant,
Ohio Association of Community Health Centers

Clinical Experts

Sharity Ludwig, EPDH, MS
Director of Clinical Innovations
Advantage Dental

Bob Russell, DDS, MPH, MPA, CPM
Public Health Dental Director
Iowa Department of Public Health

Carolyn Brown, DDS, MAEd
Healthcare Management Consultant
DentaQuest Partnership

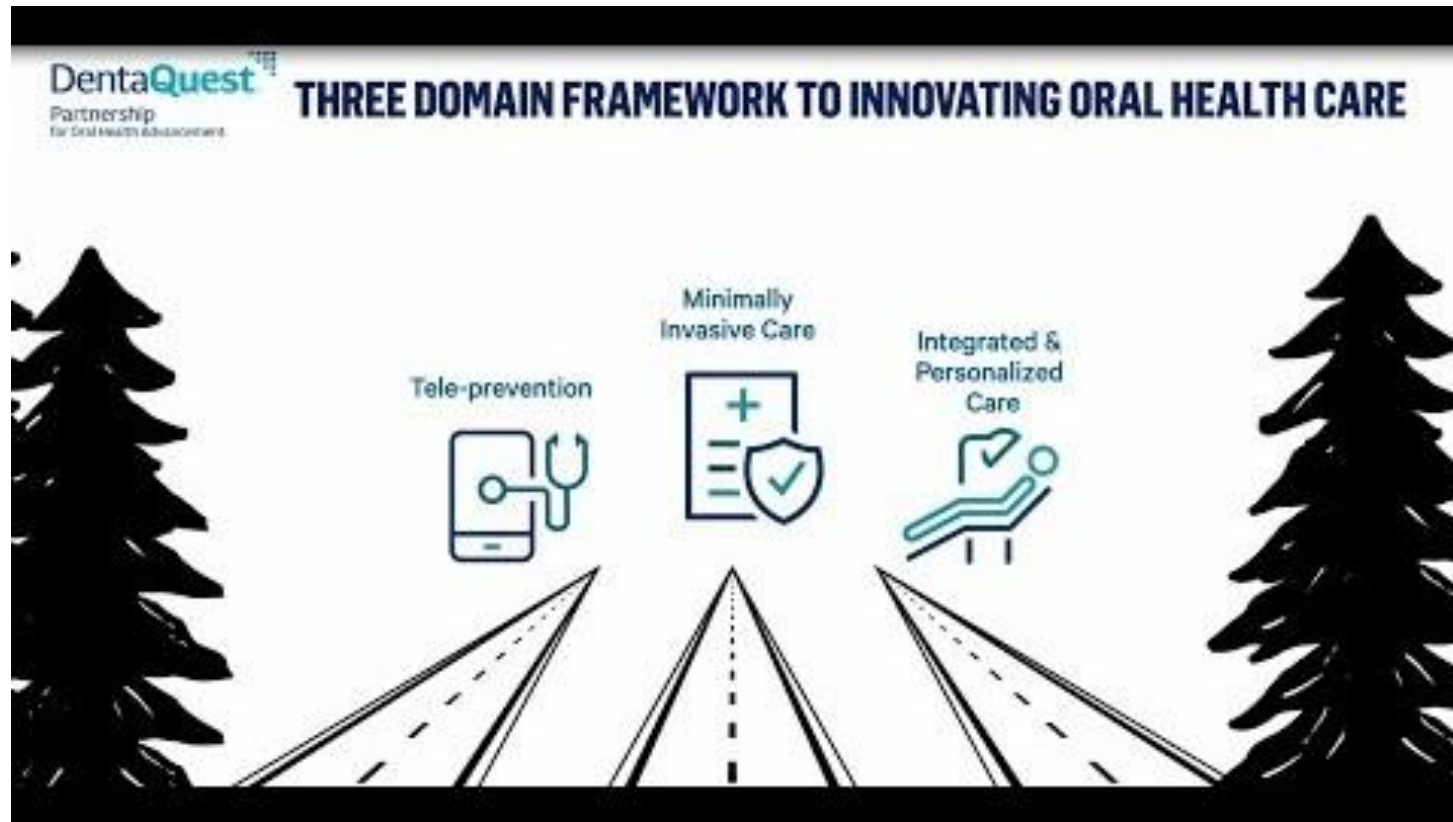

Sean Boynes, DMD, MS
VP of Health Improvement
DentaQuest Partnership

Margherita Fontana, DDS, PhD
Professor of Dentistry
University of Michigan

OVERVIEW: CORHT INITIATIVE

What is the Three Domain Framework?

What is the Three Domain Framework?

Tele-Prevention

Domain One builds an accessible evidence-based virtual care delivery approach to accompany oral health care delivery that applies technology for enhanced disease prevention and whole-person health.

Minimally Invasive Care

Domain Two focuses on minimally invasive care that reverses or slows early disease stages using a program of anticipatory guidance and collaborative decision-making with patients.

Integrated and Personalized Care

Domain Three introduces personalized oral health care that prolongs the life of hard and soft tissues by reducing tooth/tissue mortality through risk stratification, medical-dental integration, the utilization of predictive analytics and safe, individualized surgical intervention.

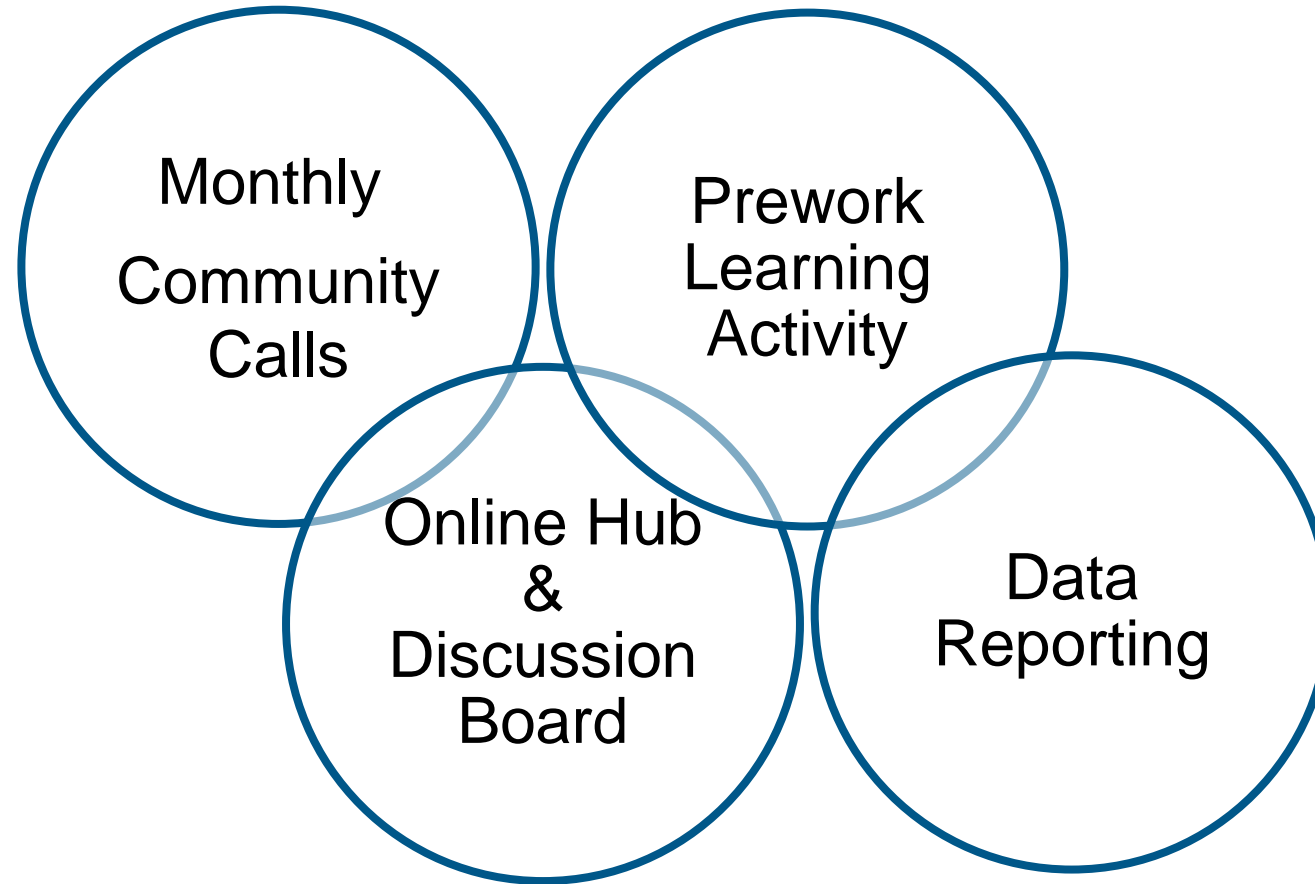

COrHT AIM: What we hope to accomplish

By September 2021, participating health centers will gain experience in a prevention-focused, whole-person care model described in the *Three Domains Framework* by testing and implementing activities such as:

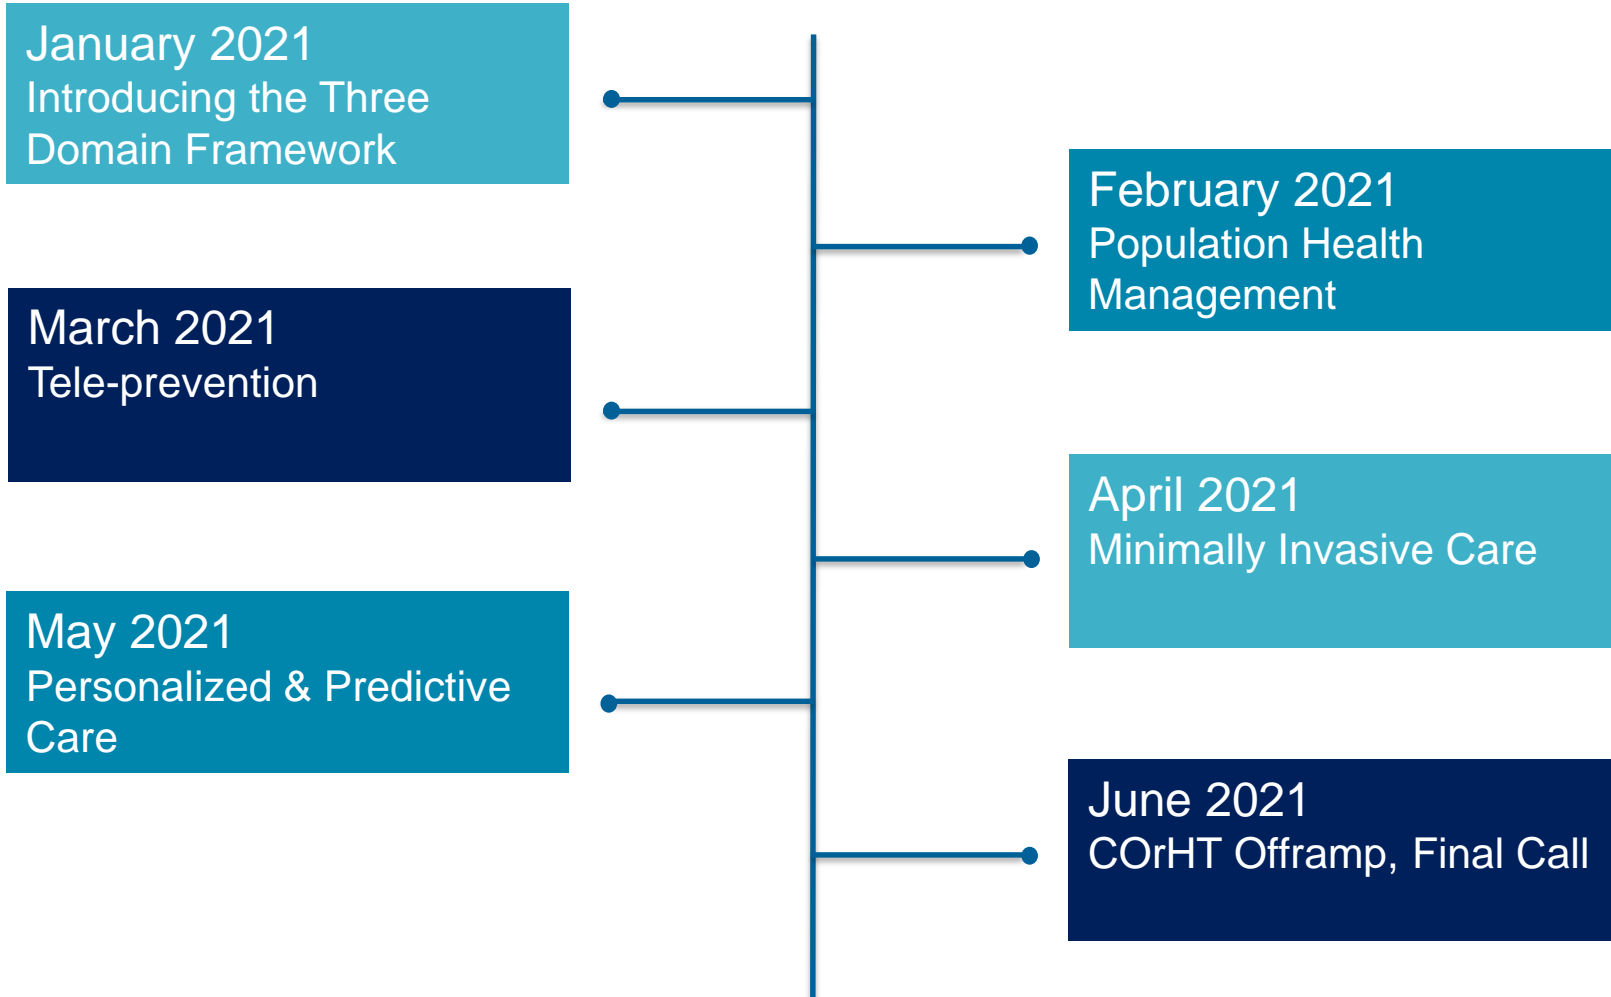

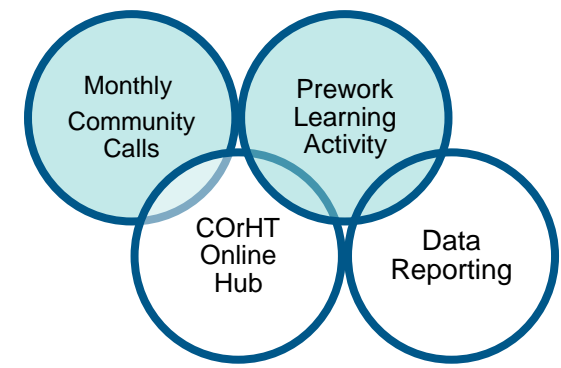

- Expanded use of telehealth and minimally invasive approaches to prioritize primary and secondary prevention
- Utilization of risk assessment and stratification to enhance population health management and scheduling practices
- Collaboration with DQP to monitor operational and financial data to understand readiness for a prevention-focused, whole-person value-based model of care

The “Why” Behind Measurement

**VALUE
BASED
CARE**

Data Collection and Reporting Process

Two categories of data will be collected by COrHT Initiative participants:

1. Data from Dental EHR/PMS (Clinical and Operational)
2. Data from Profit and Loss and Aging Reports (Financial data)

Data will be used to support measurement associated with the COrHT initiative:

- Calculate structured measurements, perform analysis, develop a dashboard of the measures, and communicate with DQP and external teams.

Onboarding Call for Data Managers: January 12th from 2-3 PM ET

You can expect us to...

Ask questions

Provide didactic and interactive content from clinical experts

Foster an environment for bidirectional learning

We'll expect that you...

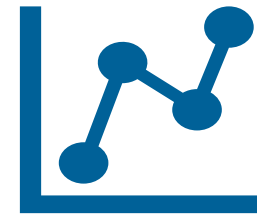

Form a COrHT Team
within your health center

Test and adopt new care
delivery strategies, and tell
us how it goes

Be an active participant in
community calls and prework
“All Teach, All Learn”

Support “All Teach, All
Learn” through data sharing
and program surveys

QUESTIONS? COMMENTS?

NEXT STEPS

Identify Your Project Team

CORHT PROJECT TEAM MEMBERS

Why Do We Need a Team?

Testing and adopting new ways of delivering care is only successful with the collective work of the team, relying on their diverse knowledge, experience, perspectives and skills.

Please select a few staff from your practice to comprise your CORHT Team. We have outlined the roles below to provide context about the types of responsibilities and activities that will be required of the team in general. Exactly *how* you fill these roles is up to you – as you know your health center and staff best.

- **Key Project Contact/Day to Day Leader:** The driver of the project, someone who understands the processes of care, and makes sure communication channels are strong to move the work forward. The Day to Day Leader attends CORHT community calls and disseminates information out to health center staff about project work. This person also is the main point of contact for CORHT Project Staff (Note: see description for data manager serving as point of contact for data-related activities).
- **Clinical Champion:** A clinical professional (preferably a dentist, though not a requirement) who is an engaged member of the project team and attends CORHT Community Calls whenever possible. The Clinical Champion works closely with the Day to Day Leader in "applying the learnings" in the clinical setting by testing new strategies and championing their adoption by clinical staff across the health center.
- **Data Manager:** The data manager is responsible for project data reporting and serves as the point of contact for data-related activities. The data manager will work with staff at DentaQuest Partnership to extract and transfer the data as part of the project deliverables.
- **Senior Leader/Sponsor:** while not necessarily involved with the details of project work, the senior leader is aware of project progress and is in communication with project team. This person also liaises with executive management and the Board, takes responsibility for results, negotiates resources, and helps alleviate barriers to progress (e.g. COO or CFO).

Name	Health Center Role	CORHT Role	Email Address

Review Welcome Packet

Review the welcome packet and complete the following:

- ✓ **Add monthly community calls to your calendars**
- ✓ **Complete (1) baseline survey per team**
- ✓ **Each team's data manager add onboarding session to calendar**
